SEO / GEO / AEO Audit Report

FULL AUDIT

SEO 6 <i>On Track</i>	GEO 8 <i>Strong</i>	AEO 7 <i>On Track</i>
---	---	---

April 29, 2026

Audit by Shark Branding Solutions — Claude Skill & Plugin by Alex Labat

Executive Summary

Shark AI Solutions is a well-structured service funnel page with genuinely strong GEO and AEO foundations — explicit pricing in schema, primary-source citations, a clean FAQPage implementation, and proprietary case study data that AI engines can cite with confidence. The single most urgent issue is that the page is an orphan: it does not appear in the sitemap, the main navigation, the mobile nav, or the footer on any other page of the site. Without those signals, crawlers have no reliable path to discover or index it. Once that is resolved, the page's on-page fundamentals are solid enough to rank and be cited quickly. Secondary priorities are adding HowTo schema to the 4-step process and converting several section headings into question format to compete for People Also Ask placements and voice responses.

Dimension	Score	Status	Key Takeaway
SEO	6/10	On Track	Strong on-page signals but orphaned from the site — not in sitemap, nav, or footer
GEO	8/10	Strong	Primary-source citations, proprietary data, strong schema — best-in-class for a service page
AEO	7/10	On Track	FAQ schema in place; misses HowTo schema, question H2s, and Speakable markup
Combined	21/30		

Pages Audited

URL / File	Page Type	Notes
shark-ai-solutions.html	Service Funnel	Primary audit target — orphaned from nav and sitemap
about.html	About / Person	Michelle Stanaland credentials, testimonial, awards
ai-visibility-consulting.html	Service Page	Strong content depth, FAQPage schema, HVAC proof

URL / File	Page Type	Notes
contact.html	Contact	Full NAP, ContactPage schema, office hours in schema
portfolio.html	Portfolio / Work	Case study links, results data, minimal schema
hvac-local-seo-case-study.html	Case Study	Article schema, author attribution, datePublished present
sitemap.xml	Sitemap	15 URLs — shark-ai-solutions, hvac case study, portfolio, plans, free-report MISSING

SEO Analysis — Score: 6/10 (On Track)

Technical On-Page

Signal	Finding	Status
Title Tag	"Shark AI Solutions Choose the Level of Help You Need" — 52 chars, brand + keyword present, within optimal range	Good
Meta Description	160 chars — right at the limit. Contains service description and implicit CTA. Tight but functional.	Good
H1	Single H1: "Introducing Shark AI Solutions" — present, unique, contains target entity name	Good
Heading Hierarchy	H1 → multiple H2 section titles → H3 card headings — logical structure, no jumps	Good
URL / Canonical	Canonical: sharkbrandingsolutions.com/shark-ai-solutions — clean, keyword-bearing, self-referencing	Good
Robots / Indexability	No noindex tag found. Page should be indexable once discovered by crawlers.	Good
Viewport Meta	width=device-width, initial-scale=1.0 — no user-scalable=no, mobile-safe	Good
Image Alt Text	No tags on the page body. OG image URL declared but not rendered inline.	Good

Signal	Finding	Status
Internal Links	Links to contact.html and hvac-local-seo-case-study.html — but NO pages link back to shark-ai-solutions from main site navigation	Needs Attention
Sitemap Inclusion	shark-ai-solutions is NOT present in sitemap.xml — crawlers cannot discover it via sitemap	Missing
Navigation Presence	Not present in main nav, mobile nav, or footer nav on any other site page — page is an orphan	Missing
Open Graph Tags	og:title, og:description, og:url, og:image, og:type, og:site_name, og:locale — complete set	Good
Twitter Card	summary_large_image, @SharkBranding — present	Good
Facebook Pixel / GTM	NOT present on shark-ai-solutions.html (present on about, contact, ai-visibility-consulting). Analytics gap on funnel page.	Needs Attention

Content Quality

Signal	Finding	Status
Word Count	Estimated 1,400–1,600 words across all sections — substantial for a service funnel page	Good
Primary Topic Clarity	"AI visibility for local businesses" + three-tier service path — immediately clear from headline and hero panel	Good
Keyword Coverage	"AI visibility", "local businesses", "done with you", "done for you", "enterprise", "Shark AI Solutions" — consistent throughout	Good
Semantic Depth	Covers search, maps, reviews, listings, AI-generated answers, structured data, trust signals — good topical breadth	Good
Content Freshness	"Updated April 29, 2026" badge in hero — visible freshness signal	Good
Source Citations	OpenAI weekly active users + OpenAI usage research PDF — both linked with rel="noopener". Search Engine Land linked.	Good
Pricing Transparency	Explicit pricing: \$497/mo (12-mo), \$597/mo (3-mo), \$2,000/mo — rare and valuable trust signal on a service page	Good

Signal	Finding	Status
Readability	Card-based layout, short paragraphs, numbered steps — highly scannable. No walls of text.	Good
Publication Date Markup	"Updated April 29, 2026" is plain text. Use <time datetime="2026-04-29"> for machine-readable date signal.	Needs Attention

Structured Data

Signal	Finding	Status
BreadcrumbList	Home → Shark AI Solutions — present, correct position values	Good
WebPage	name, url, description, dateModified — all present	Good
Service Schema	Includes name, provider, areaServed (Tampa Bay, Wesley Chapel, St. Petersburg, Lutz, Land O' Lakes), description, and three Offer objects with pricing	Good
Offer Pricing in Schema	UnitPriceSpecification for \$497 and \$597 plans, simple price for \$2,000 plan — structured pricing is excellent for AI engines	Good
FAQPage Schema	4 questions with full acceptedAnswer objects — well-formed and complete	Good
Organization @id Cross-Link	Service schema uses "provider":{"@type":"Organization","name":"Shark Branding Solutions"} without @id reference. Misses the chance to link to the main org entity graph defined on other pages.	Needs Attention
HowTo Schema	4-step process (Diagnose / Choose / Fix / Monitor) exists in the content but has no HowTo schema markup	Missing
Speakable Schema	No SpeakableSpecification markup — voice assistants cannot identify the best sections to read aloud	Missing

GEO Analysis — Score: 8/10 (Strong)

E-E-A-T Assessment

Signal	Finding	Status
Named Author / Founder	Michelle Stanaland identified as founder on about.html with photo, credentials, and LinkedIn link. Not referenced by name on the shark-ai-solutions page itself.	Needs Attention
About Page Quality	about.html: detailed bio, "Top 15 Marketing Experts in Tampa Bay — Influence Digest 2025", North Tampa Bay Chamber membership, PRWeb press mention, full testimonial from Jonathan Tuttle (drywall company, Pinellas County)	Good
Contact / NAP Data	Phone (727) 855-6505, email info@sharkbrandingsolutions.com, address 7901 4th St N Suite 300, St. Petersburg FL 33702 — complete on contact.html and in schema	Good
Testimonials / Social Proof	Testimonial on about.html from named client with job title and location. Case study results (#32 to #2 HVAC, North Tampa Bay Chamber, Emory's Rock Realty) across the site.	Good
Awards / Recognition	Influence Digest Top 15 Tampa Bay, Executive of the Year nomination, PRWeb coverage — all on about.html with live links to sources	Good
Chamber / Community	North Tampa Bay Chamber partner noted on shark-ai-solutions page with dedicated section offering chamber member pricing	Good
Person Schema	about.html has Person schema: name, jobTitle, image, knowsAbout, areaServed, award, memberOf, sameAs (LinkedIn) — exemplary entity declaration	Good
Organization Schema on Site	about.html does NOT have standalone Organization schema. contact.html has ProfessionalService inside ContactPage. No root Organization @id that other pages can reference.	Needs Attention

Content for AI Synthesis

Signal	Finding	Status
Factual Density	900M+ ChatGPT weekly users, ~10% of world adult population, 2.5B+ messages/day — specific statistics with source links	Good
Proprietary Data	HVAC: #32 to #2 in under 30 days, current #1 rankings for many keywords — unique, citable, with case study link	Good

Signal	Finding	Status
Clear Claims	Value proposition stated in first paragraph: "fix the gaps limiting discoverability before leads disappear"	Good
Source Citation Quality	OpenAI.com official blog + OpenAI PDF research + Search Engine Land — authoritative primary sources	Good
Comprehensiveness	Covers what it is, who it helps, three-tier pricing, comparison table, process steps, case study proof, FAQ, chamber note — thorough	Good
Entity Clarity	"Shark AI Solutions" and "Shark Branding Solutions" used consistently throughout with clear relationship stated	Good
Competing Entity Confusion	The site index.html is a Keatings Communications template — if that gets indexed instead of the actual homepage, it creates significant entity confusion for AI engines crawling the site	Missing
Originality Signals	Original case study data, original pricing structure, original service positioning — strong differentiation	Good

Technical GEO

Signal	Finding	Status
HTTPS	Canonical assumes HTTPS — secure site assumed. Positive trust signal.	Good
Crawlability	No robots.txt found locally. Sitemap omits key pages. JavaScript-rendered nav content may be missed by some AI crawlers.	Needs Attention
SameAs / Social Links	LinkedIn, Facebook, Instagram, YouTube in footer nav with proper aria-labels. sameAs in Person schema on about.html.	Good
Structured Data Depth	Service + FAQPage + BreadcrumbList + WebPage on shark-ai-solutions.html — strong multi-type implementation	Good
Brand Entity Completeness	Missing: standalone Organization schema with @id that all pages can reference. Each page declares the org slightly differently.	Needs Attention
AI Crawler Accessibility	Nav and footer injected via JS (main.js). If an AI crawler does not execute JavaScript, it will see an empty nav. Content sections are static HTML — the important stuff is accessible.	Needs Attention

Signal	Finding	Status
Ahrefs Analytics	analytics.ahrefs.com script present on shark-ai-solutions.html but not present on other pages reviewed — inconsistent analytics coverage	Needs Attention

AEO Analysis — Score: 7/10 (On Track)

Featured Snippet Eligibility

Signal	Finding	Status
Definition Pattern	"Shark AI Solutions is Shark Branding Solutions' AI visibility offer for local businesses that help local businesses improve how they appear across Google, maps, reviews, listings, and AI-generated answers." — strong definitional opening in FAQ schema and FAQ section	Good
Direct Answer Paragraphs	FAQ answers are 30–60 words each — right length for paragraph snippets. Clean, complete answers.	Good
List Content	Multiple lists across path feature cards, process steps, signal panels — list snippet eligible	Good
Comparison Table	Full comparison table (Path / Best Fit / Your Workload / Outcome) — table snippet candidate for "Done With You vs Done For You" queries	Good
Question-Phrased Headings	Zero H2/H3 headings are phrased as questions. All use label+noun format ("Three ways to fix AI visibility"). No PAA competition possible without this.	Missing
Keyword-Rich H2s	Section headings are thematic but not search-query-shaped — "Ways to Work With Us", "How It Works" rather than "How Does Shark AI Solutions Work?" or "What Is the Best AI Visibility Service?"	Needs Attention

Structured Answer Formats

Signal	Finding	Status
FAQ Schema	4 questions: What is Shark AI Solutions, Who is it for, Difference between three paths, Best first step — well-chosen and complete	Good

Signal	Finding	Status
FAQ Question Coverage	Missing high-volume FAQ candidates: "How much does AI visibility cost?", "What is included in the Done For You plan?", "How long does it take to see results?"	Needs Attention
HowTo Schema	4-step process (Diagnose → Choose → Fix → Monitor) has no HowTo markup. This process is a strong HowTo schema candidate that could win "how to fix AI visibility" rich results.	Missing
Speakable Schema	No SpeakableSpecification. Voice assistants (Google Assistant, Siri, Alexa) cannot identify preferred read-aloud sections.	Missing
Pricing in Schema	UnitPriceSpecification and plain price on Offer objects — pricing structured for machine extraction. Excellent.	Good

Voice Search Readiness

Signal	Finding	Status
Conversational Language	Copy is professional and clear but formal. Voice search prefers shorter, more conversational sentences. Headings especially benefit from natural speech phrasing.	Needs Attention
Long-Tail Question Coverage	FAQ covers 4 questions. Misses: "how much does it cost to improve AI visibility", "what does Shark AI Solutions do", "is Shark AI Solutions worth it", "how do I get my business to show up in AI answers"	Needs Attention
Local Signals in Body Copy	Service schema lists Tampa Bay, Wesley Chapel, St. Petersburg, Lutz, Land O' Lakes. Body copy of shark-ai-solutions page does NOT mention geographic areas — local intent queries may not connect.	Needs Attention
NAP Consistency	contact.html and schema are consistent: (727) 855-6505, info@sharkbrandingsolutions.com, 7901 4th St N Suite 300, St. Petersburg FL 33702	Good
Local Business Schema	shark-ai-solutions page uses Service schema with areaServed. The broader site lacks a root LocalBusiness or ProfessionalService @id schema that consolidates the entity.	Needs Attention

Priority Recommendations

Priority	Issue	Dimension	Effort	Impact
 Critical	Add shark-ai-solutions to sitemap.xml — currently absent, blocking crawler discovery	SEO	Low (5 min)	High — makes page discoverable to Google and AI crawlers
 Critical	Add link to shark-ai-solutions in the main nav and/or footer — currently an orphan page with zero inbound links from the rest of the site	SEO	Low (30 min)	High — page authority, internal linking, and crawl path all depend on this
 High	Add Facebook Pixel + GTM to shark-ai-solutions.html — present on other pages but missing from this funnel page, creating an analytics blind spot	SEO	Low (15 min)	High — you cannot optimize a funnel you cannot measure
 High	Add HowTo schema to the 4-step process (Diagnose / Choose / Fix / Monitor) — rich result candidate for "how to fix AI visibility" and "how to improve local search" queries	AEO	Medium (1 hr)	Medium-High — direct path to rich results and voice answer eligibility
 High	Rephrase 2–3 H2 headings as questions, e.g. "How does Shark AI Solutions work?", "What is the difference between Done With You and Done For You?", "How quickly can AI visibility improve?" — current headings are not PAA-eligible	AEO	Low (20 min)	Medium-High — unlocks People Also Ask eligibility and featured snippet competition
 Medium	Create a root Organization schema with @id (https://sharkbrandingsolutions.com/#organization)	GEO	Medium (2 hrs)	High long-term —

Priority	Issue	Dimension	Effort	Impact
	and reference it from shark-ai-solutions, ai-visibility-consulting, and other pages — currently each page declares the org differently			consolidates the entity graph for AI engines
 Medium	Add geographic area mentions to the shark-ai-solutions page body copy (e.g. "serving Tampa Bay, Wesley Chapel, St. Petersburg, Lutz, and Land O' Lakes") — local areas only appear in schema, not visible body text	AEO / GEO	Low (15 min)	Medium — improves local intent matching and voice search results
 Medium	Expand FAQ on shark-ai-solutions to include: "How much does AI visibility cost?", "What is included in Done For You?", "How quickly do results show?" — 3 high-search-volume question patterns not currently covered	AEO	Low (45 min)	Medium — increases PAA and featured snippet coverage
 Medium	Add <time datetime="2026-04-29"> wrapper around the "Updated April 29, 2026" badge — currently plain text, machine-unreadable as a date signal	SEO	Low (5 min)	Low-Medium — freshness signal for crawlers and AI engines
 Quick Win	Add Michelle Stanaland's name and a one-sentence bio to shark-ai-solutions (e.g. in the footer or a small "Who built this?" note) — the E-E-A-T credentials are strong site-wide but absent from this specific page	GEO	Low (15 min)	Medium — connects the page to the strong personal entity established on about.html
 Quick Win	Resolve the index.html content: the root index.html is currently a Keatings Communications client build. If deployed as-is, it will appear as the Shark Branding Solutions homepage to crawlers, creating severe entity confusion.	SEO / GEO	Critical (verify)	Critical — most damaging issue across the entire site if

Priority	Issue	Dimension	Effort	Impact
				deployed incorrectly

What's Working Well

Pricing transparency in schema

Explicit UnitPriceSpecification objects (\$497/mo, \$597/mo, \$2,000/mo) inside the Service Offer schema — most service pages hide pricing from structured data entirely. This is rare and gives AI engines concrete data to cite.

Primary-source citations with authority links

The OpenAI weekly active users and OpenAI usage research PDF are linked directly from the body copy with rel="noopener". Search Engine Land is also cited. These are the exact sources AI engines trust and re-cite.

FAQPage schema — concise, well-chosen questions

4 FAQ entries covering definitional, comparative, and next-step questions — each answer 30–60 words, correctly structured in JSON-LD. Ready for rich result extraction today.

Site-wide E-E-A-T is genuinely strong

Michelle's about.html is one of the best-executed personal E-E-A-T pages for a local consultant: named award (Influence Digest, linked), chamber membership (linked), PRWeb press mention (linked), named testimonial with job title and location, Person schema with LinkedIn sameAs, and knowsAbout fields.

Comparison table — table snippet candidate

The "Compare the Paths" table (Done With You / Done For You / Enterprise + Best Fit / Workload / Outcome) is structured HTML with thead/tbody and could win a table-format featured snippet for queries like "Done With You vs Done For You AI visibility".

Proprietary case study data cited on-page

The HVAC proof section (from #32 to #2 in under 30 days) with a direct link to the full case study is the kind of original, specific, verifiable claim that AI engines prefer to cite over generic marketing copy.

Glossary

SEO — Search Engine Optimization

The practice of improving a website so it ranks higher in traditional search engine results pages (Google, Bing). Covers technical structure, on-page content, internal linking, and external signals like backlinks.

GEO — Generative Engine Optimization

Optimizing content to be cited, summarized, or recommended by AI-powered search engines (Google AI Overviews, Perplexity, ChatGPT Search, Gemini). GEO prioritizes factual density, entity clarity, E-E-A-T signals, and structured data that AI systems can extract and synthesize.

AEO — Answer Engine Optimization

Optimizing for featured snippets, People Also Ask boxes, and voice search responses — moments where a search or AI engine delivers a direct answer rather than a list of links. AEO techniques include question-phrased headings, direct answer paragraphs, FAQ schema, HowTo schema, and Speakable markup.

E-E-A-T

Experience, Expertise, Authoritativeness, and Trustworthiness — Google's framework for evaluating content quality and the credibility of the people and organizations behind it. Strong E-E-A-T signals include named authors with credentials, third-party recognition, citations, reviews, and transparent contact information.
